

HUMAN ERROR

THE NEMESIS OF CYBERSECURITY!

*This is your reminder to invest in proper **cybersecurity training** for your business!*

Wondering why we love to bring up cybersecurity training **so frequently?** It's because we've seen the consequences of **human error** hurt businesses too many times...

No one expects to be the employee who falls victim to a phishing attempt or website vulnerability, but these threats still persist because they work on businesses who **don't take their cybersecurity seriously!**

AVOID THE REGRET.

We look for every opportunity to prevent human error from **costing your business** hard-earned money. Visit our website at headlinepc.com; we're experts that you can rely on!
