

# CYBERSECURITY

## CHEAT SHEET

We understand that your time is precious, and the security of your business **can't wait!** That's why we've compiled a few **essential cybersecurity tips** into this email as a cheat sheet:

### Recognize and Report Phishing:

Learn the signs of phishing emails, such as urgent requests for information and unexpected attachments, **and report them immediately!**

### Enable Multi-Factor Authentication:

Always opt for MFA where available to add an **extra layer of security** beyond just a password.

### Use Secure Wi-Fi Networks:

Avoid unsecured public Wi-Fi for work-related activities. If you must, use a reputable VPN to **encrypt your connection.**

**We look for every opportunity to prevent human error from costing your business hard-earned money. Visit our website at [headlinepc.com](https://headlinepc.com); we're experts that you can rely on!**
